

# An agent you can train and trust

From inspection and consultation to reports you can trust.

---

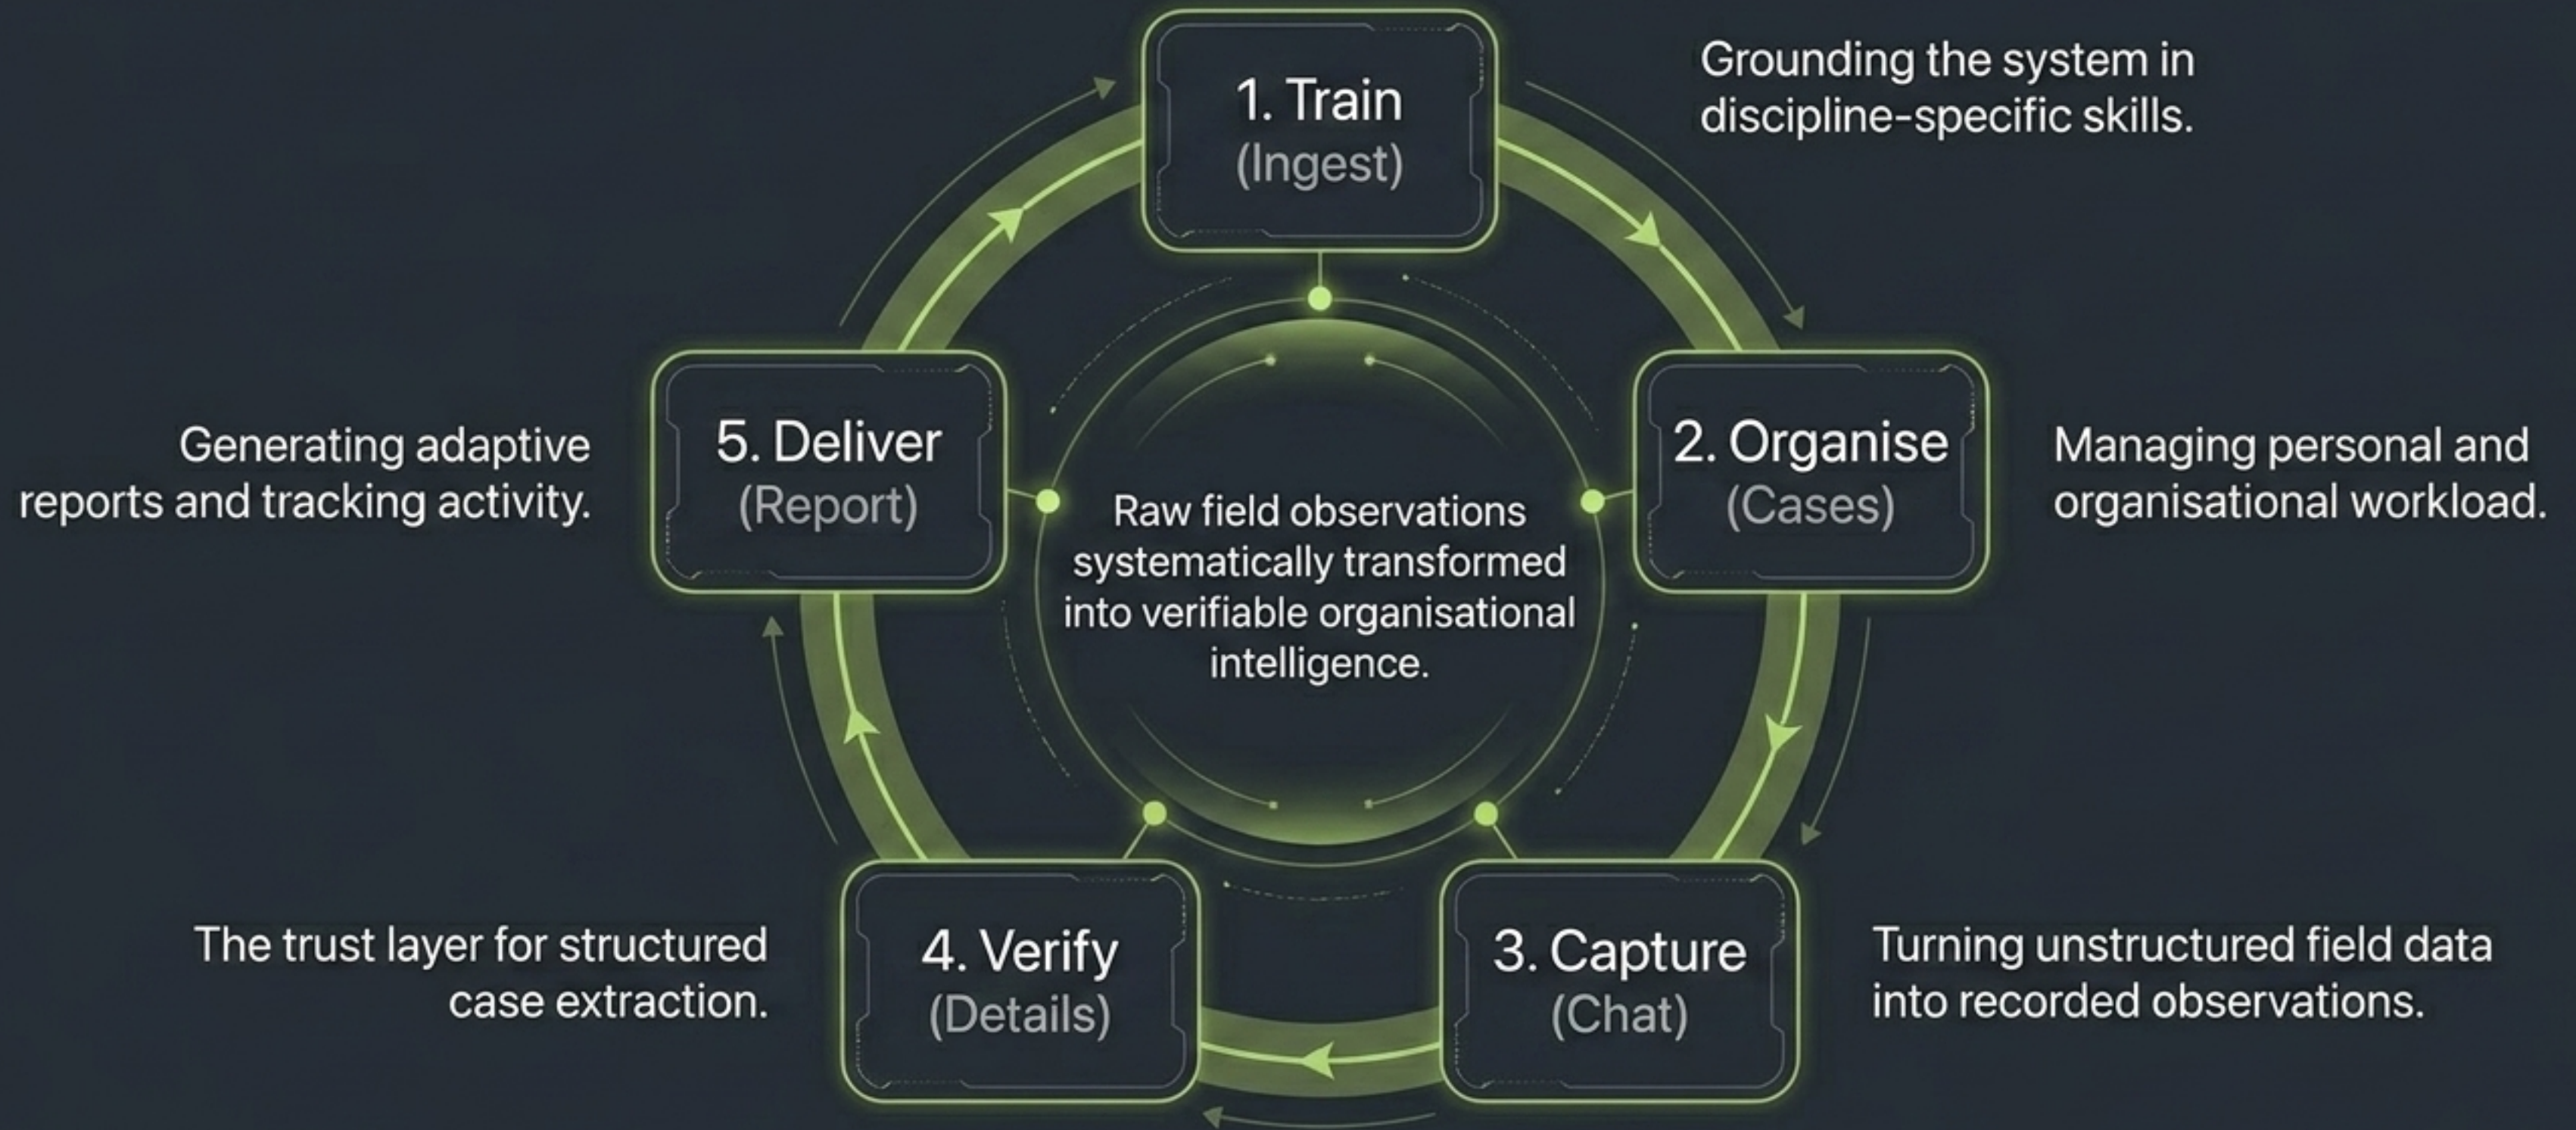

Web Application • MS Word Plug-in • iOS • Android

# The Trust Gap in Professional Workflows

Generic AI	
Knowledge Source	Relies on broad, unverified web data.
Data Structure	Produces black-box reasoning.
Traceability	Lacks user accountability or audit trails.
Output Control	Generates generic, unpredictable text.

Oxx-AI
Grounded strictly in <b>discipline-specific, uploaded organisational gold-standards.</b>
Enforces <b>structured verification and editable case schemas.</b>
Provides a <b>full, timestamped auditability layer tracking every user action.</b>
Uses <b>adaptive reporting templates to dynamically reorganise facts</b> for specific audiences.

# A Continuous Intelligence Loop

My Cases

Organisation Cases

**Clear Ownership Split:**  
Distinguish personal workload from shared records.

### Canine Examination

Active

Immediate Operational Awareness.

Shared with org

Photos: 4   Observations: 12   Areas: 3

**Content Density Indicators:**  
Judge case maturity instantly before opening.

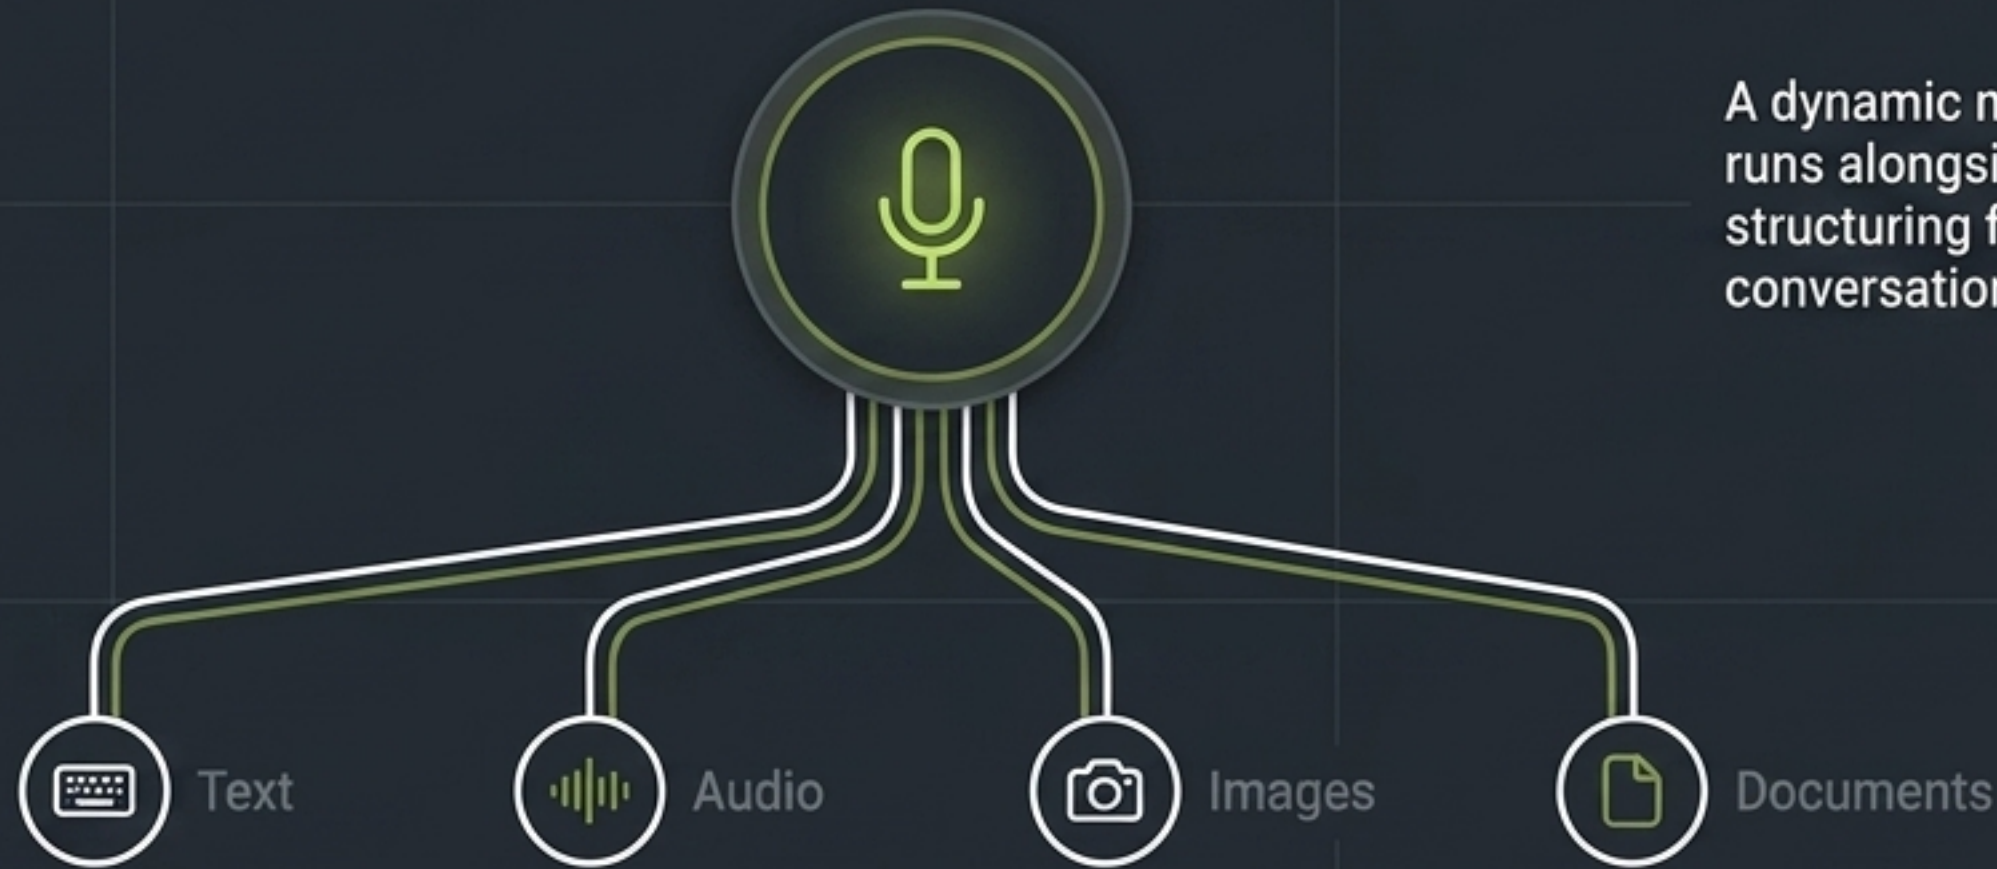

### Feline Dental Assessment

Pending

Private

Photos: 2   Observations: 5

# ANATOMY OF THE CHAT WORKSPACE

A dynamic metadata panel runs alongside the chat, structuring free-flowing conversation in real time.

## CASE INFORMATION

Species:  
Canine

Breed:  
Golden Retriever

Age:  
5 Years

Consent:  
Recorded

Last Visit:  
2024-05-15

Status:  
Active

## DATA CAPTURE

Solo note capture via voice or text. Convert dead transit time into productive case development.

## CONSULTATION

Two-party interaction with speaker-labelled transcription (Professional vs. Client).

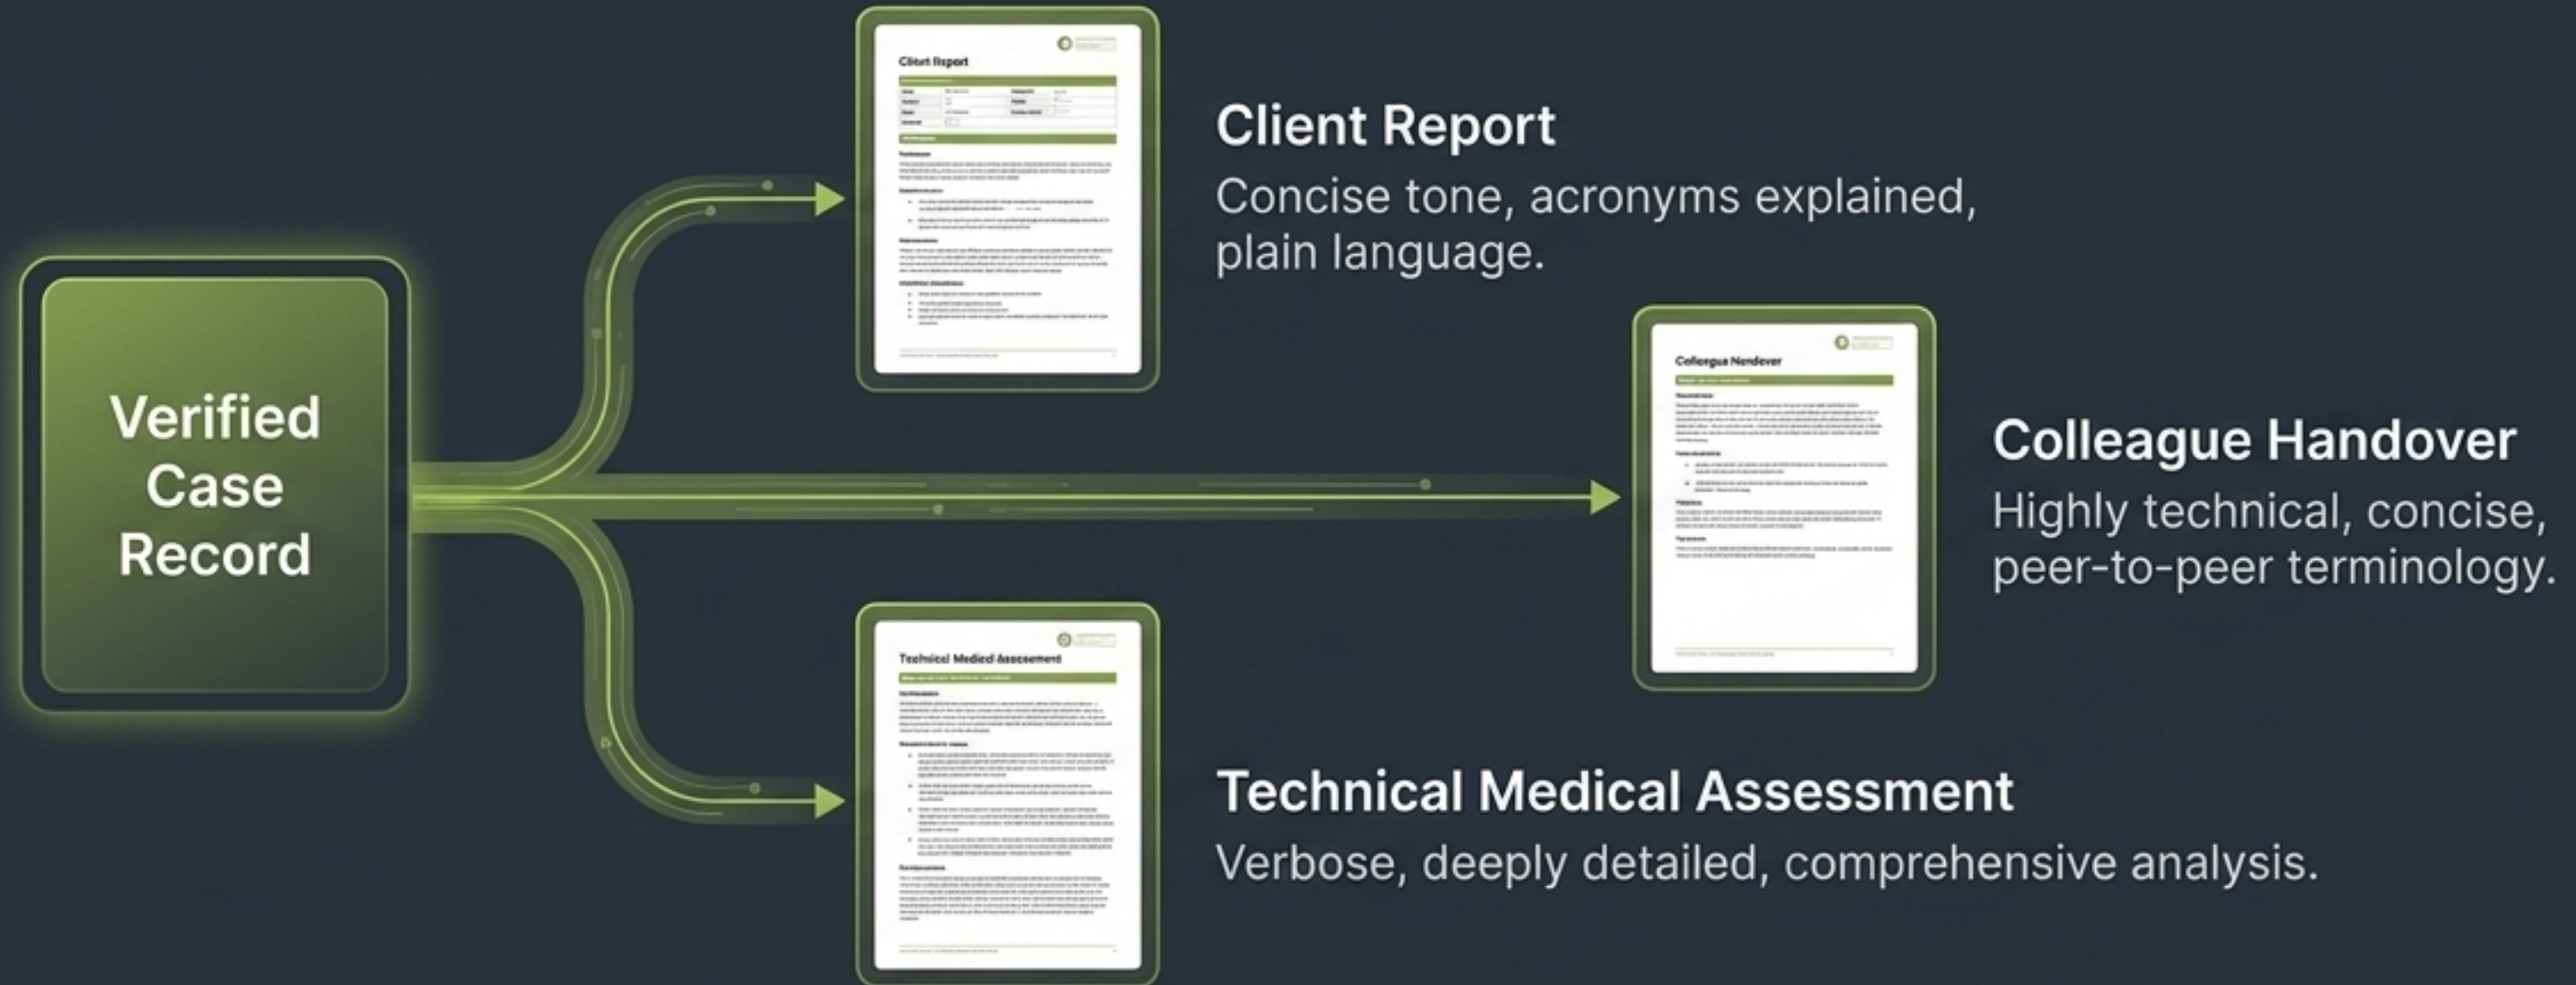

## DIAGNOSTIC

Guided investigation. The AI proactively prompts for missing information.

# The Details Trust Layer

# ADAPTIVE REPORTING ENGINE

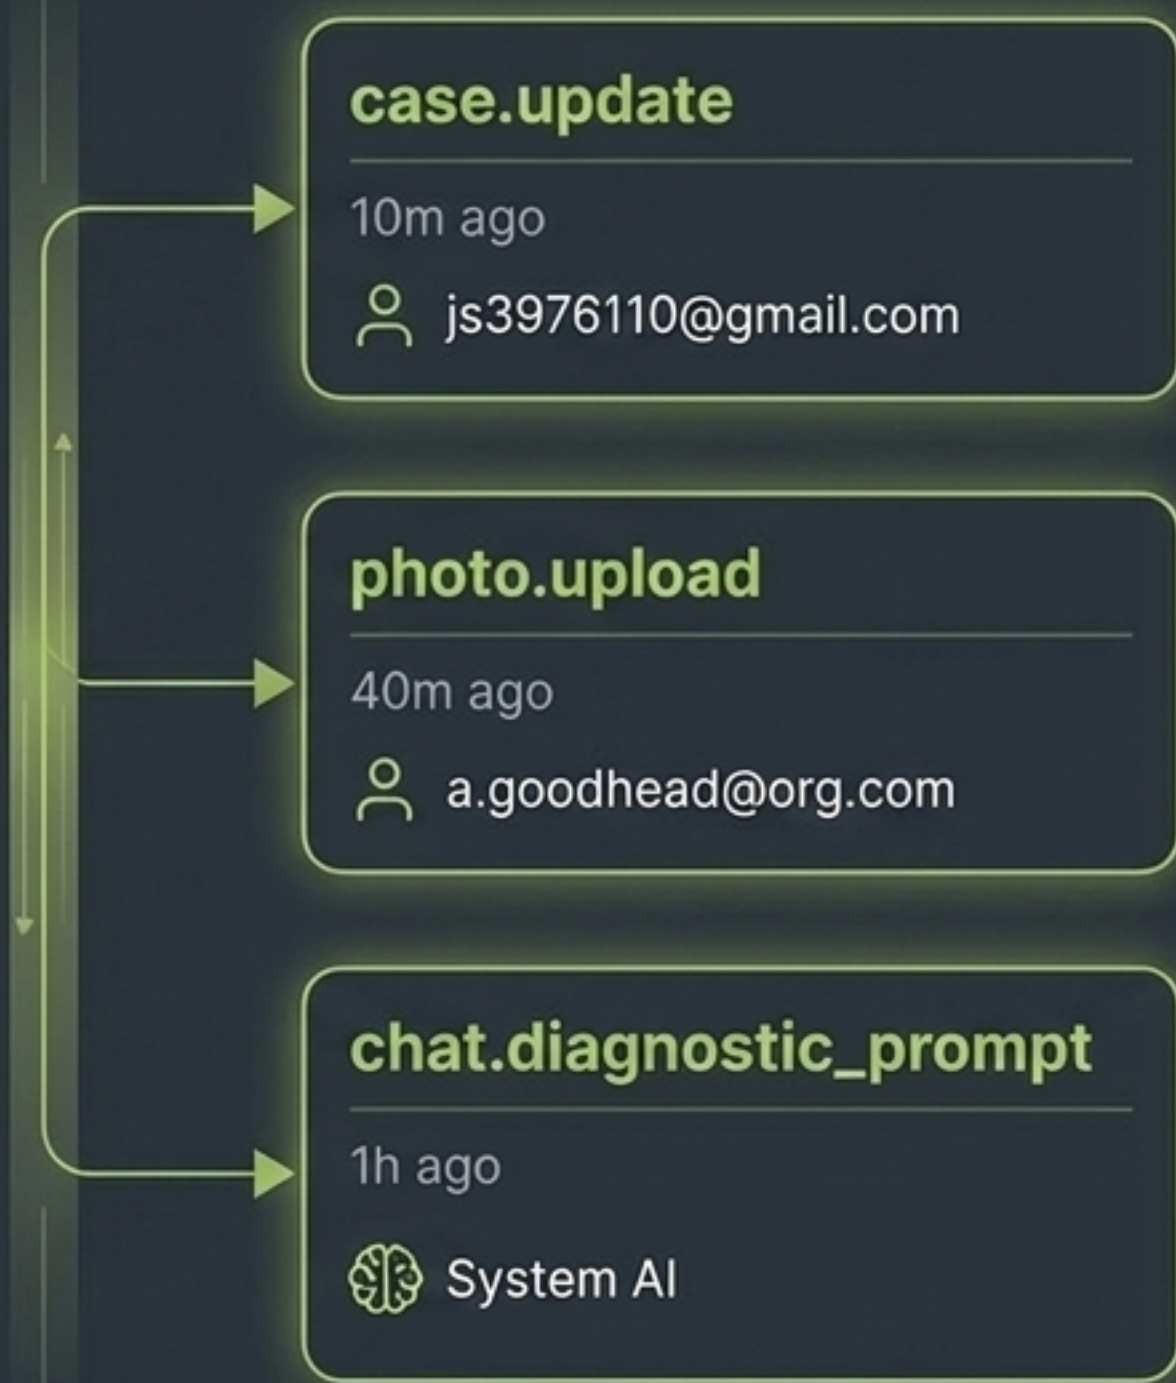

**Dynamic Organisation:** Rearrange facts based on audience (e.g., defects sorted by type vs. defects by floor location).

**Corporate Integration:** Upload Word/PDF templates to perfectly copy corporate formatting.

# The Details Trust Layer

## Who touched the case, what they changed, and when.

- Multi-user collaboration visibility across the organisation.
- Traceable engagement history for both file updates and chatbot interactions.
- The ultimate accountability layer completing the capture-verify-report workflow.

# Interrogate: Live Organisational Intelligence

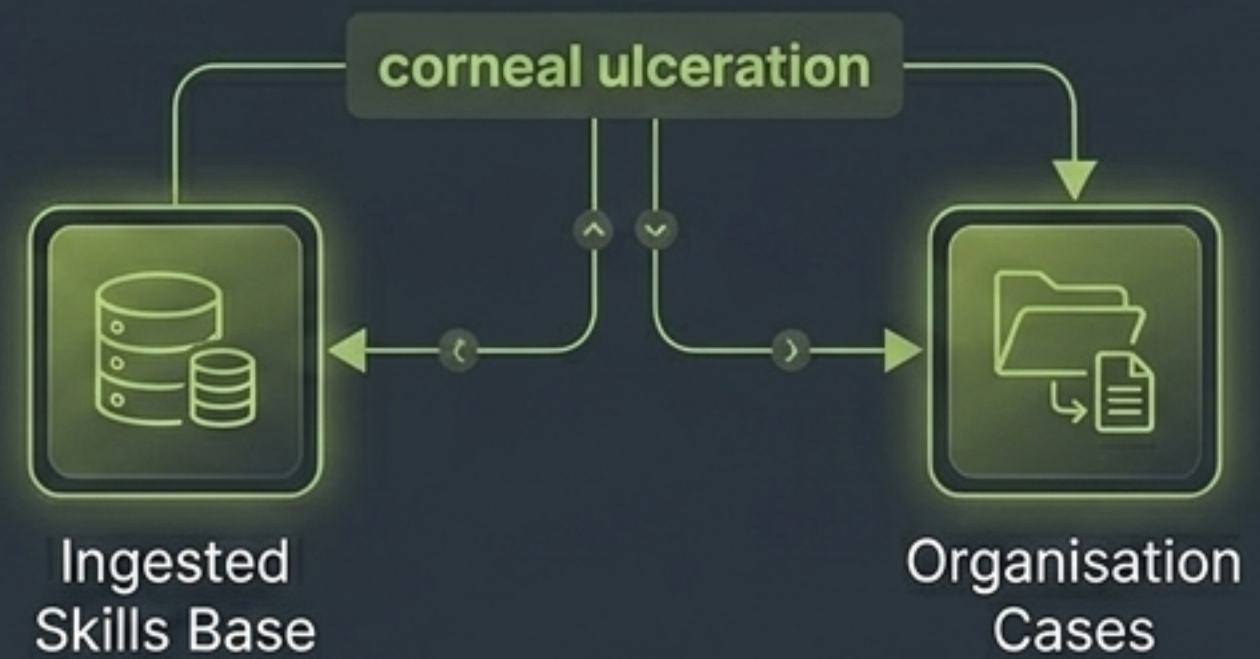

## The Query

How many cases relate to dogs?

Summarise all cases dealing with corneal ulceration.

## The Engine

Debug/Trace

### Proactive Alerting

Set prompts to be notified instantly when complex or specific case types arise.

### Training Asset

Turn historical case archives into a live, interactive professional development tool.

# Analyze: Executive Operational Visibility

Total Cases: **1,402**

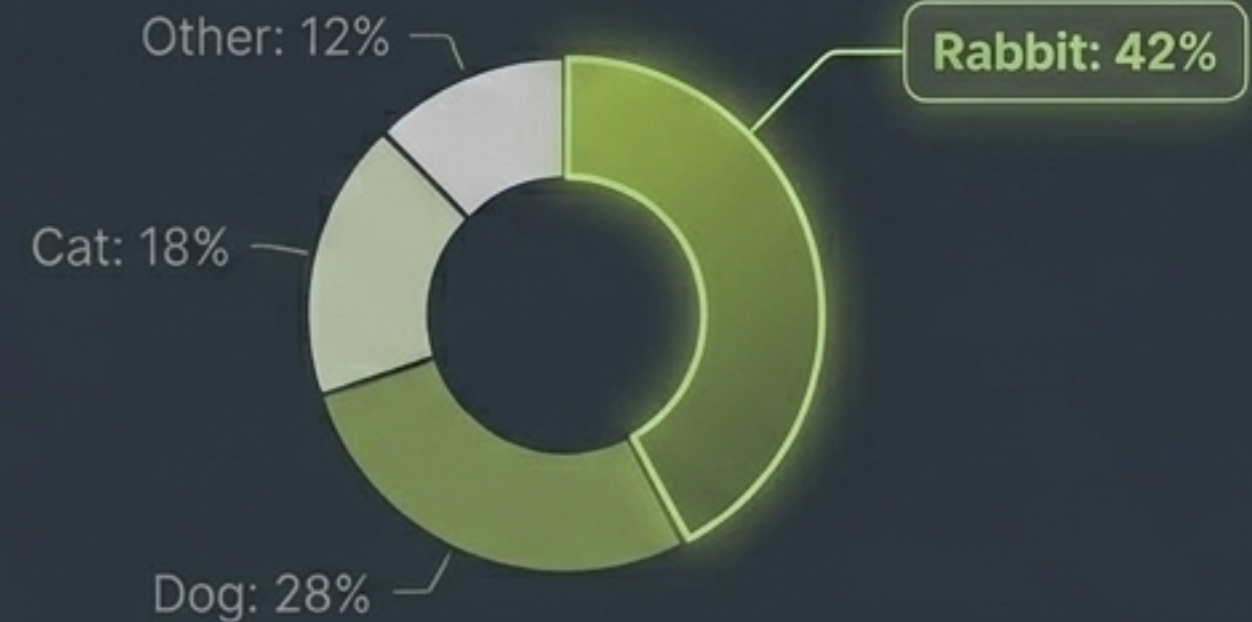

Cases This Month: **84**

Top Diagnoses: **Corneal Ulcer**

## Cases per Month

## Species Breakdown

**Contextual Adaptation:** The dashboard automatically maps to the profession. A veterinarian sees species breakdowns, while a structural engineer tracks defect categories.

# Administer: Collaborative Team Governance

**Team Integration:** Add multi-user teams to the same shared platform for seamless case collaboration.

**Central Workspace:** Manage security, billing, and account controls in one secure environment.

Name	Email	Member Status	Subscription	Next Billing
------	-------	---------------	--------------	--------------

Elena Petrova	elena.p@company.com	Admin	Pro Plan	Nov 1, 2024
---------------	---------------------	-------	----------	-------------

Kenji Tanaka	kenji.t@company.com	Active	Standard Plan	Nov 15, 2024
--------------	---------------------	--------	---------------	--------------

David Chen	david.c@company.com	Pending	Pro Plan	N/A
------------	---------------------	---------	----------	-----

**Access Control:** Administrators can instantly pause or revoke access, ensuring secure lifecycle management.

# One Architecture. Boundless Adaptation.

## Veterinarian

---

Capture:  
Consultation mode  
interviewing an owner.

---

Schema:  
Patient breed, age, weight,  
symptoms.

---

Output:  
Technical Medical  
Assessment & simplified  
Owner Handover.

## Structural Engineer

---

Capture:  
Hands-free voice capture  
while driving from site.

---

Schema:  
Defect type, specific location  
(e.g., 13th floor), severity.

---

Output:  
Technical compliance report  
reorganised dynamically by  
location.

## Safety Inspector

---

Capture:  
Photo imports and live  
dictation on the factory floor.

---

Schema:  
Hazard category, legal  
consent, compliance markers.

---

Output:  
Legally focused extraction  
and immediate risk summary.
